RESTRICTED USE PESTICIDE
Due to Dermatitis
For retail sale to, and use only by Certified Applicators, or persons under their direct supervision and only for those uses covered by the Certified Applicators Certification.

KILLS RATS & MICE
ACTIVE INGREDIENT: Diphacinone (CAS #82-66-6) . . . . . . . . . . . . . . . . . . . . . 0.2%
OTHER INGREDIENTS: . . . . . . . . . . . . . . . . . . . . . 99.8%
NET WT: 6 lbs (2.7 kg)

KEEP OUT OF REACH OF CHILDREN
WARNING
See back panel for First Aid and additional precautionary statements.

DIRECTIONS FOR USE (Continued from other panel)
Gives special attention to the clipping ability of rodents. For this species, use suitably PVC, sheet metal, combined or standard fitting_lid trapping securely attached to tails or other horizontal surfaces when rats will enter. Empty traps long enough to prevent uplift of powder through the ends.

APPLICATION DIRECTIONS: Temporarily expose 10 to 30 (level teaspoons) DITRAC TRACKING POWDER in pastes, 20 to 60 for large or larger rats. Apply the powder into the treated spaces or holes or nests with a needle-lor similar distant. Do not cause danger for danger in much a manner as to expose the rat to it. That means may be conducted by 2 to 5" and should not be approached such situations. For new cathedrals that are located along the periphery of buildings and that are likely to serve as routes of entry into those structures. Place about 1 gram of powder in each burrow with foot pump duster (about 15 pumps). Close burrows with soil, loose concrete, or paper. Repeat for sum is required. Monitor powder in treated areas for at least 20 days.

FOLLOW UP: Replace contaminated powder immediately.彼得 ware waterproofed, collect and properly dispose of and all visible dead animals and powder, as well as any powder that becomes accessible to non-target animals. To discourage refugium, lethal sources of rodent bait, water and habitat as much as possible. If reinfestation occurs, repeat treatment.

PRECAUTIONARY STATEMENTS
In order to treat rodent and Domestic Animals
WARNING: May be fatal to cats, dogs, and other predators. Avoid breathing dust. Keep away from children, domestic animals and pets. Do not get in eyes, on skin, or on clothing. Avoid contact with eyes, mouth, and skin. Do not allow children to come in contact with this product.

DITRAC TRACKING POWDER

KILLS RATS & MICE

ACTIVE INGREDIENT:

Diphacinone (CAS # 82-66-6): 0.2% 
OTHER INGREDIENTS: 99.8%

TOTAL: 100.0%

WARNING:

May be fatal if absorbed through the skin. Harmful if swallowed. Avoid breathing dust. Keep out of reach of children.

DIRECTIONS FOR USE:

Net weight: 6 lbs (2.7 kg)

For use on or near buildings, including attics, basements, crawl spaces, walls, attics, and similar areas.

APPLICATION DIRECTIONS:

Sprinkle in patches 12 inches long and 6 inches wide. Apply the powder into the rodent burrow or holes or within walls with a hand bulb or similar duster. Do not use power dusting devices. Systemic rods are not suitable for this use. Use it as a remote treatment. Do not use in areas where children, pets or wildlife can come into contact with the bait.

FOLLOW-UP:

Replace contaminated powder immediately. Wash waterproof gloves, collars and other clothing. As with all rodenticides, be sure to keep children, pets or wildlife out of the area.

User Safety Requirements:

Follow manufacturer’s instructions for cleaning/deseeding PPE. No such instructions for reseeding. Keep PPE separated from other farm tools. Remove PPE if possible while working. Remove PPE before eating, smoking, or using the toilet. Wash hands and other exposed skin after use.

Environmental Hazards:

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon food that has eaten this bait. Do not contaminate water when disposing of Ineffective water or waste.

RESTRICTED USE PESTICIDE

Due to Dermal Toxicity

For retail sale to, and use only by, Certified Applicators, or persons under their direct supervision and only for those uses covered by the Certified Applicators Certification.

DIRECTIONS FOR USE (Continued from other panel)

Give special attention to the clotting ability of milk. For this species, use suitable PVC pipe, sheet metal, cardboard or rigid tubing securely attached to rafters or other horizontal surfaces where rats will learn. Emphasize the importance of removing all food and water sources for at least 30 days. Use pathways through attic spaces. Do not contaminate water during application of this product.

STORAGE AND DISPOSAL

Nonrefillable container. Do not reuse or refill this container. Do not contaminate water when disposing of equipment wash water or rinsate. Rinse containers and equipment thoroughly before reusing or disposing of in the trash. Wash and discard PPE separately from other laundry.

NOTE TO PHYSICIAN OR VETERINARIAN

Anticoagulant Diphacinone: If animal eats bait, call veterinarian or 1-877-854-2494 at once. If animal ingests bait, call veterinarian or doctor immediately for treatment advice. Call a poison control center or doctor immediately for treatment advice. If animal eats bait, call veterinarian or 1-877-854-2494 at once.
